Special issue

Presenters have the option to have their papers considered for a special issue of the Review of Behavioral Finance

Edited by Gulnur Muradoglu and Nigel Harvey

Venue

Cass Business School 106 Bunhill Row London EC1Y 8TZ

Call for Papers

Overview

Traditionally, financial economists have based their analysis of financial contracting on the assumption that agents are fully rational, emotionless, self-interested maximisers of expected utility (the homo economicus assumption). Behavioural economists are increasingly recognising that financial decision makers may be subject to cognitive biases and the effects of emotions (the homo sapiens view). Their work parallels that of economic psychologists who have, for many years, been concerned both with the psychological mechanisms underlying economic behaviour and with the psychological effects of economic events.

In this meeting, we will consider the many areas of common concern to those working in behavioural finance and economic psychology. These include processes underlying the financial judgments and decisions involved in spending, saving, trading, forecasting, currency exchange, and other financial behaviours. Examples of such processes are risk perception and risk taking. They also include phenomena associated with those behaviours, such as overconfidence, framing, loss aversion, herding, optimism, biased information search, and the money illusion.

We seek contributions relating to these issues at the level of

- Markets of various types
- Households, corporations or other financially active groups
- Individual consumers, investors or traders.

We invite you to submit extended abstracts, papers-in-progress or full papers by **15 February 2011**.

The organisers will come back with a decision within three weeks after this deadline. To submit a paper for consideration please email a PDF version of the paper to **Behavioural-Finance@city.ac.uk**

Papers selected for presentation at the meeting will, at the author's request, be considered for publication for a Special Issue of the *Review of Behavioral Finance*.

Behavioural Finance Working Group

Background and purpose

Behavioural finance is a truly interdisciplinary field at the cross section of finance and psychology, with linkages to economics and sociology. It studies human behaviour, its reasons and its implications in finance. The Behavioural Finance Working Group (BFWG) was established in January 2008. It is led by Professor Gulnur Muradoglu at Cass Business School.

The group aims to:

- Facilitate interdisciplinary work by integrating finance, psychology, sociology and economics and promote the field of behavioural finance
- Facilitate interaction between academia and industry to ensure that we have a better understanding of the world around us and can develop models that can successfully be implemented.

Keynote speaker

Professor Tommy Gärling

Professor **Tommy Gärling**, Professor of Psychology at Goteborg University will give the keynote speech on *Behavioural Impediments to Efficient Stock Investments:* Overview and Explanations.

Biography

Tommy Gärling graduated in 1972 from Stockholm University with a PhD in Psychology. After positions as Assistant Professor of Applied Psychology and Associate Professor of Psychology at Umeå University, Research Professor of Psychology and Planning at the Swedish Research Council of Humanities and Social Sciences and Director of the Transportation Research Unit at Umeå University, he was in 1992 appointed as Professor of Psychology at Göteborg University. Tommy Gärling is the co-editor of nine books and has authored and co-authored close to 400 book chapters, articles, and technical reports primarily in the areas of the psychology of attitudes, judgment, and decision making, environmental psychology and travel behaviour.

His articles have been published in leading international psychology, geography, and transportation journals. He is the past president of the environmental psychology division of the International Association of Applied Psychology and a former member of the board of the International Association of Travel Behaviour Research. He is a member of the editorial board of Journal of Environmental Psychology and Transportation, and is an associate editor of Journal of Economic Psychology.

Keynote speaker

Professor Neil Stewart

Professor **Neil Stewart**, Mathematical Psychologist at Warwick University will give the keynote speech on **Abandon Utility**, **Weighting and Discounting Functions**.

Biography

Neil Stewart is a mathematical psychologist at Warwick University, with research interests in behavioural and psychological science. Neil trained as a natural scientist at Cambridge before moving to Warwick to study for his PhD. Neil's recent work focuses on economic decision making and the representation and processing of money, risk, and delay. Recent findings include demonstrating that including minimum payments on credit card statements actually reduces the repayments of most people, and that visiting the supermarket - and many other everyday experiences - alters how you value money.

An extreme possibility is that there is no such thing as utility, and Neil's decision-by-sampling theory (with Nick Chater and Gordon D. A. Brown) offers a utility-free explanation of our choice behaviour.

Behavioural Finance Working Group Conference Schedule

Registration: 09.00 – 09.30

Parallel Sessions: Sessions 1A and 1B (09.30 - 11.00)

Session 1A: Financial Bias 3 (09.30 - 11.00) - Room 2003

Session Chair: William Forbes

Presenter/Discussant	Title
Presenter: William Forbes	Modelling Earnings Momentum Using a
Discussant: Darren Duxbury	Representative Agent Framework
Presenter: Marcela Giraldo	Allocation of Research Resources:
Discussant: William Forbes	Dynamics of Analysts' Coverage
Presenter: Darren Duxbury Discussant: William Forbes	Do the Disposition and House Money Effect Coexist? The Differential Impact of Realized and Unrealized Gains and Losses

Session 1B: Financial Decision Making 1 (09.30 – 11.00) – Room 2002 Session Chair: Chris Olivola

Presenter/Discussant	Title
Presenter: Gabrielle Lepori Discussant: Gabriela Breaban	Positive Mood Risk Attitudes, and Investment Decisions: Field Evidence From Comedy Movie Attendance in the US.
Presenter: Oliver Marnet Discussant: Gabrielle Lepori	Bias in the Boardroom: Effects of Bias on the Quality of Board Decision-making
Presenter: Gabriela Breaban Discussant: Oliver Marnet	The Demand for Structured Products: An Experimental Approach

Coffee break: 11.00 - 11.30

Parallel Sessions: Sessions 2A and 2B (11.00 – 13.00)

Session 2A: Financial Biases 1 (11.30 – 13.00) – Room 2003

Session Chair: Eric Overby

Presenter/Discussant	Title

Presenter: Octave Jokung Discussant: Margarida Abreu	A Note on cross-prudence in wealth and hedonic adaption to health deterioration
Presenter: Margarida Abreu Discussant: Darren Duxbury	Information, Overconfidence and Trading: Do the Sources of Information Matter?
Presenter: Darren Duxbury Discussant: Octave Jokung	Do the Disposition and House Money Effect Coexist? The Differential Impact of Realized and Unrealized Gains and Losses
